TEAMS**

**Deliver Your
PROJECTS**

**Shape a Better
FUTURE**

Turn your people into a competitive advantage.
Deliver complex technical projects easily
with the right talent and knowledge
to reach your true potential.

 **easy skill**

Find.

"Easy Skill is the best in the business because they are incredibly responsive and always find the right experts with the highest quality profiles who are available when you need them," Head of Procurement, Glencore.

Finding highly-skilled talent can be a nightmare. You need rare, technical expertise to execute your critical projects just like everyone else. **So how can you win the talent war?**

As a group of technical experts ourselves, we totally get your project requirements. We speak tech and can translate project needs into roles and opportunities. They say it takes one to know one and we recognise technical talent a mile away. And we work together as one global team at high velocity **to provide quality candidates within days.**

"Mobilising experts in some countries can be almost impossible from work permits to legislation and taxes for health care. It's complicated. When we need to get it done right the first time and quickly, we call Easy Skill who takes care of the rest," Operations Director, CGG.

Moving people around the world demands specialised knowledge and government expertise. If you don't like administrative headaches, we can help. We're experts at global mobility. We know how to make international moves simple and painless, **so you can get back to doing the work you love.**

Global mobility is the key to drafting the world's best talent on your team. When your **global talent strategy requires diversity, expertise, and availability**, we've got you covered.

Move.

Train.

"Easy Skill helped me to identify the best training solutions and organised national delivery across Australia," National Technical Manager, Fenner Dunlop Australia.

Knowledge is powerful when applied correctly. But keeping up with changing requirements, rules, and skills developments is too demanding. **If you're overwhelmed by the endless training possibilities, we can help.**

We maximise your team's potential with the right knowledge at the right time. We figure out exactly what training you need and organise everything from delivery to administration. We help people, teams, and companies achieve more. **Let us help you unlock your staff's true potential.**

"We are so thankful to have Easy Skill on the project to give us peace of mind and ensure our project safety, quality, and overall design is not compromised," Project Manager, Water Authority of Fiji.

When you commit to a new project, hiring the expert team to execute takes time you don't have. When your project teams are already at capacity, it makes sense to team up with a consulting engineering partner. You can **transfer accountability and risk** with comprehensive solutions and ensure delivery by having our team work for you.

We can deliver in-house project support and engineering solutions. Your standards become ours and we execute work according to your business needs and values. When you need more than just a few experts, **we can become an extension of your team**. We can help you meet tight deadlines, deliver projects, produce results, and build your reputation.

Power Up.

Productivity suffers when complex projects can't build the right teams. Finding the special technical talent you need is hard. Specialised experts are in high demand across the world.

Skills shortages hold you back. But they don't have to. It can be a big hassle to bridge the talent gap working alone. Not to mention upskilling your staff when you have urgent projects to deliver.

With the **right people partner**, you can transform your people nightmares into your competitive advantage. With one simple call, you can take back control of your productivity and elevate your internal capabilities. We **build technical dream teams** that save clients just like you time and money.

Plus you will gain the confidence to get more done and take on bigger, better projects. We can **help you find the world's best technical talent, move them anywhere you need, and give your staff practical knowledge** to deliver outstanding results. We can **even deliver engineering projects**.

It's time to **supercharge your project teams** to reach your true potential.

more people power
